

PUBLIC HEALTH WEBINAR SERIES ON BLOOD DISORDERS

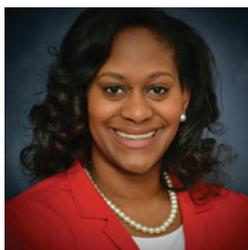

BRINGING SCIENCE INTO PRACTICE

The Division of Blood Disorders is proud to offer this webinar series, providing evidence-based information on new research, emerging issues of interest in blood disorders, as well as innovative approaches to collaboration.

COMMUNITY COUNTS: Understanding Hemophilia and Other Bleeding Disorders through Public Health Surveillance

AUGUST 24, 2023 • 2:00–3:00 PM ET

PLEASE PREREGISTER HERE: [HTTPS://BIT.LY/3WUUUHB](https://bit.ly/3WUUUHB)

Brandi Dupervil, DHSc, MPH

Epidemiologist, Epidemiology and Surveillance Branch, Division of Blood Disorders, National Center on Birth Defects and Developmental Disabilities, Centers for Disease Control and Prevention

Vanessa R. Byams, DRPH, MPH

Lead Health Scientist, Epidemiology and Surveillance Branch, Division of Blood Disorders, National Center on Birth Defects and Developmental Disabilities, Centers for Disease Control and Prevention

Skye Peltier, MPH, PA-C

Clinical Consultant, American Thrombosis and Hemostasis Network
Clinical Co-Director, Children's Minnesota, Center for Bleeding and Clotting Disorders

Over the past 20 years, the Centers for Disease Control and Prevention (CDC) has conducted public health surveillance to better understand the characteristics and complications that impact the bleeding disorders population. Community Counts is a public health surveillance program that gathers and shares information about common health issues, medical complications, and causes of death that affect people with bleeding disorders cared for in U.S. Hemophilia Treatment Centers (HTCs). Community Counts is funded by CDC through a cooperative agreement awarded to the American Thrombosis and Hemostasis Network in partnership with the U.S. Hemophilia Treatment Center Network.

In this presentation, Drs. Dupervil and Byams will provide an overview of Community Counts, its components, and its role in monitoring important health outcomes. They will present key findings on the occurrence of bleeding disorders, and information collected to date on population demographics, clinical characteristics, and other health indicators. They will share plans for ongoing and future work using data to track health outcomes over time.

LEARNING OBJECTIVES:

1. State the three components of Community Counts.
2. Describe the use of public health surveillance to better understand and improve the health of people with bleeding disorders.
3. Describe key findings from Community Counts.

This webinar is free and open to healthcare providers, pharmacists, and public health researchers who desire more information about bleeding disorders.
